Our Knowledge :

25 years of experience at your service !

Structured Cabling

Each of our networks are designed based on our customers' specific needs and particularities of where they are installed. The location restrictions, workspace cleanliness, technician efficiency, product quality as well as overall safety are always taken into account and we respect all the industry standards. Thus ECMOR creates long lasting networks that can easily expand.

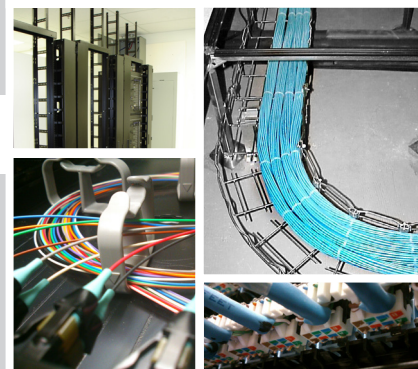

Wireless Networks

ECMOR has the latest softwares in order to perform reliable site surveys which will allow the installation of the access points and antennas in the most appropriate locations to give customers a complete RF coverage. We are committed to providing the best service of wireless network installation.

Optical fiber

When distance and speed becomes a major concern, the installation of an optical fiber is necessary. Our technicians are up to date with the latest technologies and because optical fiber is sometimes capricious, we are committed to delivering only the best quality.
